 Lab at Office
 Note for [REDACTED] on 8/4/2008 - Chart 00005071

Chief Complaint (1/1): This 78 year old female presents today for a health maintenance exam.
 Many medications switched as she's under the care of Dr. Valenzuela (nephro) and Dr. Carida (cardiac) and between the 3 of us, we are all working on aggressive BP control.
 She has Hypertensive heart and renal disease; CKD stage 4 now.
 She's still smoking. Blood pressure labile.
 Blames work stress and she has a point as she is the family provider now that her husband's health is declining.

Allergies: Patient admits allergies to ace inhibitor resulting in cough.
